

Custodial Lighting Luminaires

Introduction

Thorlux can supply an approved range of luminaires and systems to the UK Prison Service for all areas of prison establishments from workshops, canteens and recreational areas to corridors, landings and safe-cell accommodation blocks. Thorlux has developed these products in close consultation with the National Offender Management Service (NOMS) to meet stringent standards.

NOMS is part of the Ministry of Justice and regulates the procurement and supply to prisons of all manner of products, including lighting.

The Thorlux Prison Range includes a wide selection of specially formulated luminaire designs for 'non-accommodation', 'cell' and 'safe-cell' prison areas.

The NOMS standards for the construction, performance and longevity of in-cell luminaires are based on Home Office specifications. These standards detail the requirements of luminaires for use in both standard and safe-cell accommodation and introduce a testing regime far in excess of previous Home Office requirements.

In the development of the Thorlux 'Accommodation' Area Lighting System, an extensive programme of impact, burn and anti-ligature tests were undertaken in association with NOMS engineers to ensure that the luminaires and systems would not allow occupants to self harm. High severity impact testing using cell available items specified by NOMS as impact providers ensures that these luminaires and systems will sustain no operational impairment during service. NOMS testing further ensures that diffusers will withstand attack from such items as screwdrivers and cutlery and will withstand many minutes of naked flame attack after which there will still be no ligature attachment risk.

NOMS certification also applies to luminaires and systems for use in Police Custody Suites, Customs and Excise Establishments, Court Premises and Mental Health and Secure Units.

'Vandalux Prison' - Lighting for safe-cell accommodation areas*

Thorlux has designed the Vandalux Prison luminaires to comply with the rigorous demands of prison accommodation. This lighting system is highly durable and almost fit and forget.

The Vandalux Prison system is a continuous cornice-mounted system with infill sections to adjust to different cell lengths. Integral trunking compartments facilitate through wiring and other electrical services such as power outlet trunking drops and surveillance camera installation to provide a fully self-contained multi-purpose system.

High efficiency optics and thermal properties within the luminaire ensure optimum operation and performance of the LEDs and a night-light provides illuminance to the bedhead.

Bespoke versions can be designed to suit specific applications.

Vandalux Prison - Specification

- NOMS approved for standard cells and safe cells
- Anti-ligature
- IP65 rated as standard
- Robust steel body, frame and infill panels
- Highly impact-resistant polycarbonate diffuser
- Switchable light level option with night-light facility
- · Tamper-resistant external and internal fixings
- · Optional integral multi-compartment trunking
- Integral emergency, AutoTest and Scanlight AT versions

Vandalux Prison - Applications

- Safe cell accommodation
- Standard cell accommodation
- Landings, corridors, walkways
- Recreation rooms, canteens
- Gymnasiums

^{*} Available to special order

Lighting for non-accommodation areas

Vandalux - NOMS approved prison cell versions available to special order

- Anti-ligature
- IP65 ingress protection rating
- IK10 impact resistance rating
- Rigid steel body construction: full polyester powder coated black (white option available)
- Steel front cover frame retained by tamper-resistant fixings
- Satin polycarbonate front cover
- Continuous mounting via infill sections
- Emergency, AutoTest and Scanlight AT versions

Suitable for walkways, corridors, landings, recreation rooms, workshops, canteens, toilets, stairwells, medical wards and any other supervised areas

A-Line Prison

- Anti-ligature
- IP65 ingress protection rating
- IK10 impact resistance rating
- Extruded aluminium body: full polyester powder coated white
- Stippled polycarbonate front cover retained by tamper-resistant fixings
- Emergency, AutoTest and Scanlight AT versions

Suitable for walkways, recreation rooms, workshops, canteens, stairs, training rooms and any other supervised areas

G3-AL

- Anti-ligature
- IP65 ingress protection rating (from underside)
- IK10 impact resistance rating
- Remote phosphor mixing chamber
- Steel bezel: full polyester powder coated white
- Tamper-resistant fixings
- Clear polycarbonate front cover
- Emergency, AutoTest and Scanlight AT versions

Suitable for shower areas, toilets, canteens, visitor areas and any other supervised areas

G2-AL

- Anti-ligature
- IP20 ingress protection rating
- IK10 impact resistance rating
- Remote phosphor mixing chamber
- High pressure die-cast bezel finished full polyester non-yellowing white
- Tamper-resistant fixings
- Clear polycarbonate front cover
- Emergency, AutoTest and Scanlight AT versions

Suitable for shower areas, toilets, canteens, visitor areas and any other supervised areas

Cleanline Prison

- Anti-ligature
- IP65 ingress protection rating (from underside)
- IK10 impact resistance rating
- Covers in prismatic polycarbonate or clear polycarbonate with LG7 louvre
- Extruded aluminium frame: full polyester powder coated white
- Tamper-resistant fixings Special key required, see page 7
- Emergency, AutoTest and Scanlight AT versions

Suitable for kitchens, wash-down rooms, laundry rooms and any other supervised areas

Cobalt-AL

- Anti-ligature
- IP66 ingress protection rating
- IK10 impact resistance rating
- Die-cast aluminium body: full polyester powder coated white
- Spun aluminium cover frame retained by tamper-resistant fixings
- Opal polycarbonate front cover
- Night light version available
- Emergency, AutoTest and Scanlight AT versions

Suitable for walkways, corridors, landings, shower areas, toilets and any other supervised areas

Securlite

- Anti-ligature
- IP66 ingress protection rating
- Approved for standard cells
- Robust steel body and frame
- High impact-resistant polycarbonate satin diffuser
- Tamper-resistant external fixings
- Night light version available
- Emergency, AutoTest and Scanlight AT versions

Suitable for walkways, corridors, landings, shower areas, toilets and any other supervised areas

Realta

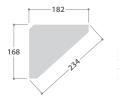

- Anti-ligature
- IP66 ingress protection rating
- IK10 impact resistance rating
- One piece die-cast aluminium body: full polyester powder coated graphite
- High efficiency injection-moulded vacuum-metallised reflector
- Prismatic polycarbonate front cover
- Tamper-resistant fixings
- Emergency, AutoTest and Scanlight AT versions

Suitable for external walkways and perimeter lighting

Vandalux

Note: Supply entries and fixing points to be drilled on site. IP65 integrity must be maintained.

Range
