Search for Thorlux SmartScan

IMPORTANT INFORMATION

Before starting please make sure you have access to the building address, group address and channel frequency, these can be found on your documentation/SmartScan website and install the USB Dongle in a location that is within 10m of the first installed luminaires.

The USB Dongle uses 868/922MHz secure wireless mesh technology to communicate with SmartScan ColourActive luminaires.

USB DONGLE AND APP

FEATURES

- The USB Dongle and App allows:
 - The user to control preset scenes or colour temperature (if ColourActive luminaires installed).
 - Create custom scenes incorporating colour temperature settings.
- USB dongle can be powered from a computer or dedicated USB power supply, please follow the wizard installation process on your mobile phone, if you require assistance please see the help section within the app.
- Default password to gain access: 0527

**For further assistance or help
with the app, please contact
technicalhelpline@thorlux.co.uk
or call on 01527 586 400.**

BUILDING, GROUP & DEVICE ADDRESS - Example

 = Building  = Group  = Device

Building 1

BUILDING 1

All luminaires within groups 1-6 have their building address set to 1, and their relevant group address set. This will ensure that all lights in Building 1, and only Building 1, communicate within their group, but groups do not communicate with each other.

Building 2

BUILDING 2

By setting the building address to 2, these luminaires will not communicate with the adjacent building. All luminaires within a group will communicate, but groups will remain separate.

MAINTENANCE

The **USB dongle and app** should not be subjected to undue mechanical shock or extremes of temperature. Clean only with a clean dry cloth.

MODIFICATIONS

Thorlux products should not be modified. Any modification may render the product unsafe and will invalidate any Safety/Approval marks.

NOTICE TO CONTRACTOR - PLEASE PASS THIS LEAFLET TO THE END-USER
